RESUME.md

Jonathan Guzman

Software Engineer

Profile

A detail-oriented software engineer with the ability to establish a marketing foundation through the creation of an application or website. Proficient in front-end web development utilizing JavaScript, NodeJS, and React. Finds inspiration with every new project and uses learning experiences as building blocks for the next challenge. An individual with a background in visual arts, can bring unique perspective to the table.

Experience

* Homer Learning January 2020 – May 2020

Software Engineer, Intern

User Management System

- * Mobilized a greenfield project to coordinate the formation, visualization and modification of user data
- * Utilized AWS-Amplify alongside DynamoDB's cloud database service to store new users and information unique to each one
- * Used React-Redux with TypeScript to create a user-friendly environment

* General Assembly September 2016 – January 2017

Web Development Immersive, Web Developer

Calorie Search Engine

- * Accessed third-party API data to render information based on a user's search
- * Used BCrypt and Express-sessions to set up an encrypted Sign-up and Log-in system
- * Implemented a PostgreSQL database to store API data onto a personalized user dashboard

Education

* Lehman College September 2017 – May 2021

Bachelor of Science in Computer Science

Bachelor of Arts in Mathematics

* General Assembly September 2016 – January 2017

Web Development Immersive

* Per Scholas May 2016 – June 2016

Software Testing Education Program
